

To Whom Address the Services of Domiciliation

To whom address the services of company formation?

To companies that are in need for their brand image of rewarding premises, to small businesses whose leader wants to have an office away from home or to overseas companies who need premises to guarantee their presence. However, the legal interest of the services of company creation in Morocco has been narrowed in recent years. Since the law for economic initiative of August 1st 2003, named Dutreil law, the rules of companies domiciliation have been simplified, reducing the interest of domiciled companies. Indeed, for individual companies, the concept of "headquarters" has been removed. The entrepreneurs may, without time limit, domicile their business at home, provided of course that no contractual or legislative arrangement objects.
